

Gestionnaire - Reinstallation - EN

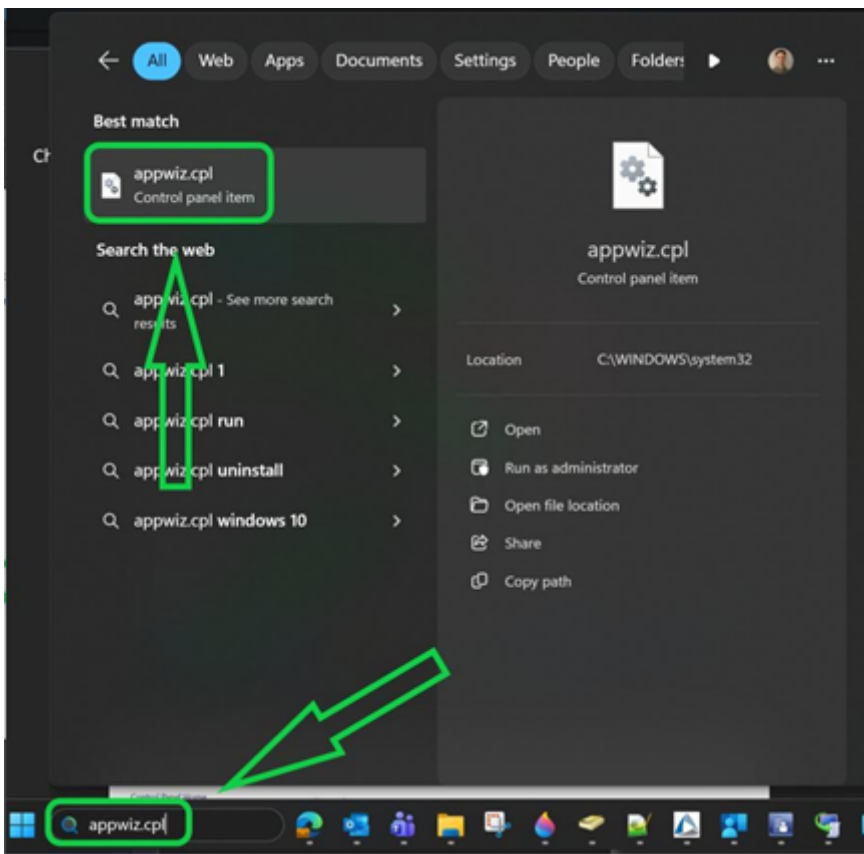

Object: Reinstall the GCM Launcher

Description

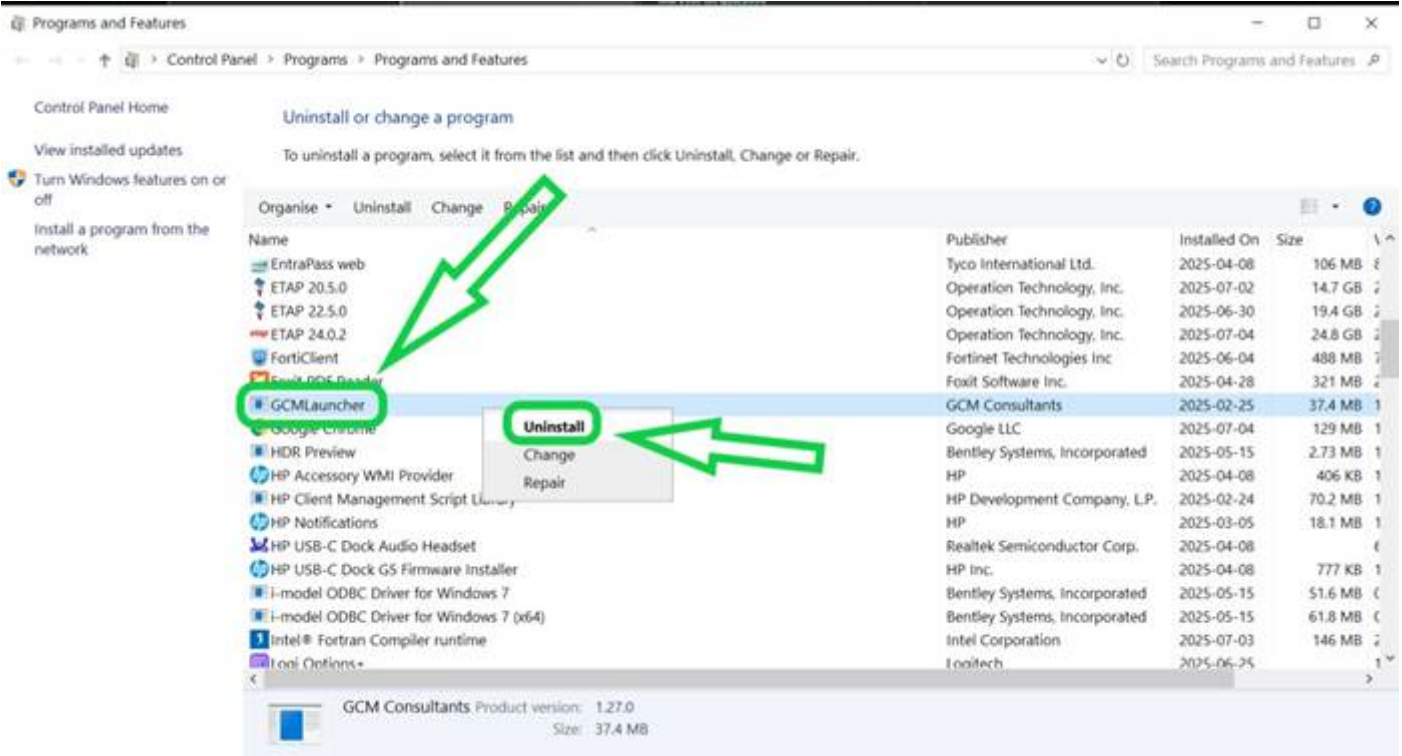

This procedure guides you through the uninstallation and reinstallation of the GCM Launcher application.

Steps

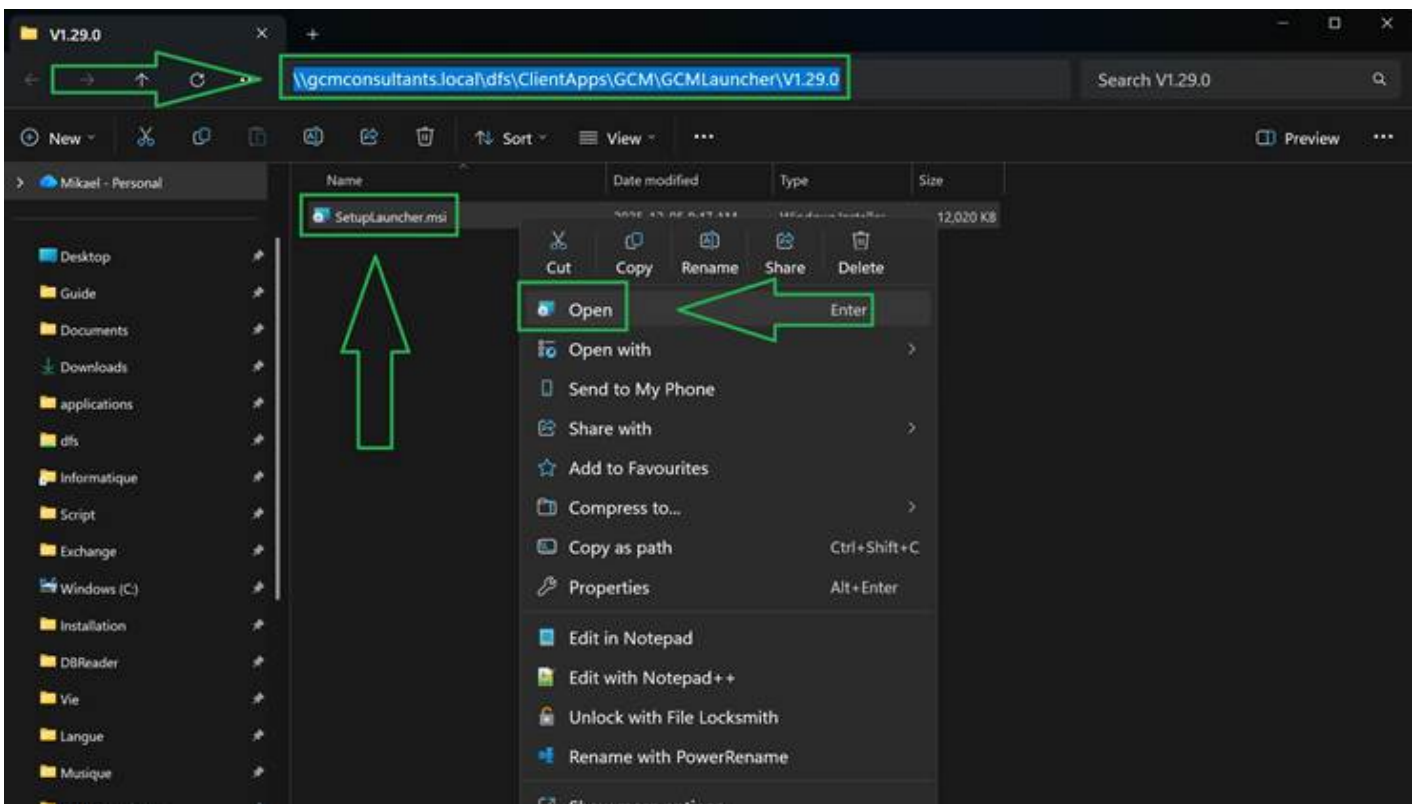

1. Search for `appwiz.cpl` in the Windows search bar and open it.

2. Select `GCMLauncher` from the list of programs, uninstall it, and then restart your computer.

3. Copy the path `\\gcmconsultants.local\dfs\ClientApps\GCM\GCMLauncher\V1.29.0`, paste it into the File Explorer address bar, and run the `SetupLauncher` file to install the application.
