

NVIDIA App - Configuration - EN

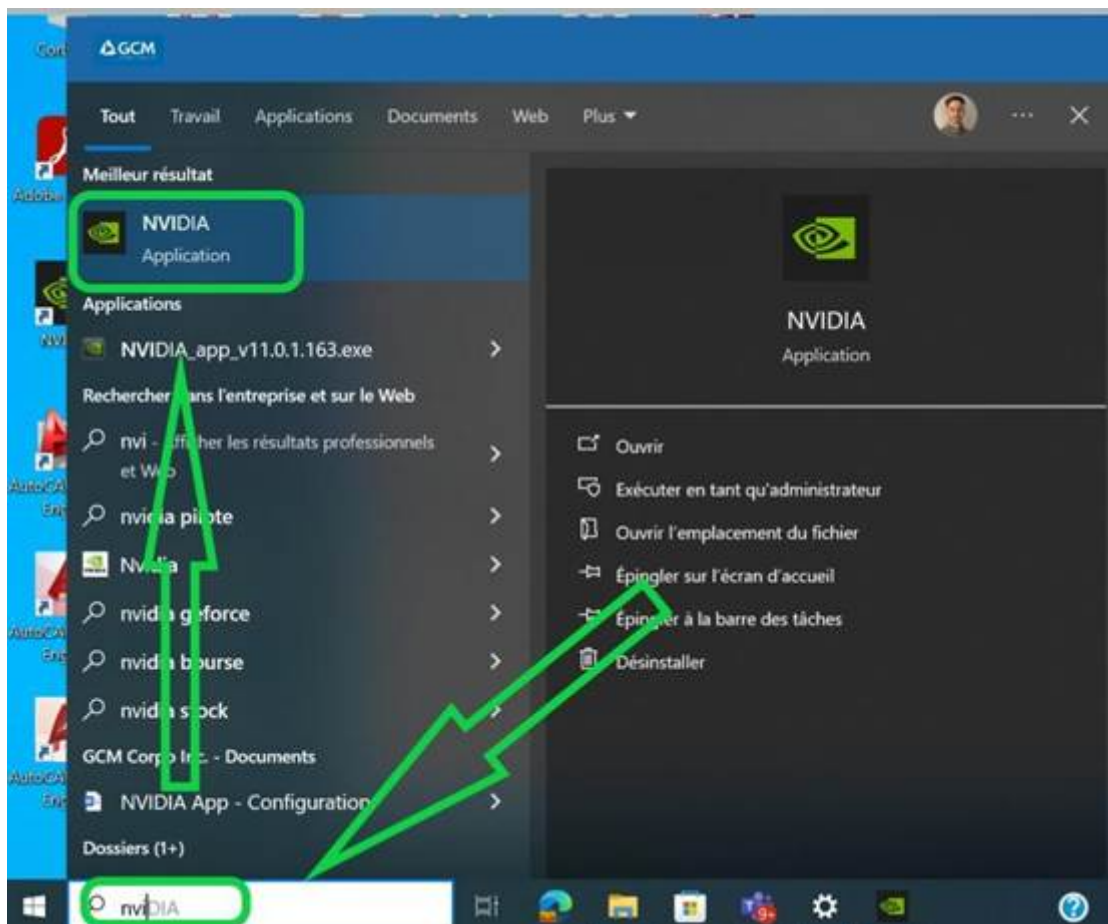

Object: NVIDIA App Initial Configuration

Description

This guide explains how to perform the initial setup of the NVIDIA App and configure automatic driver downloads.

Steps

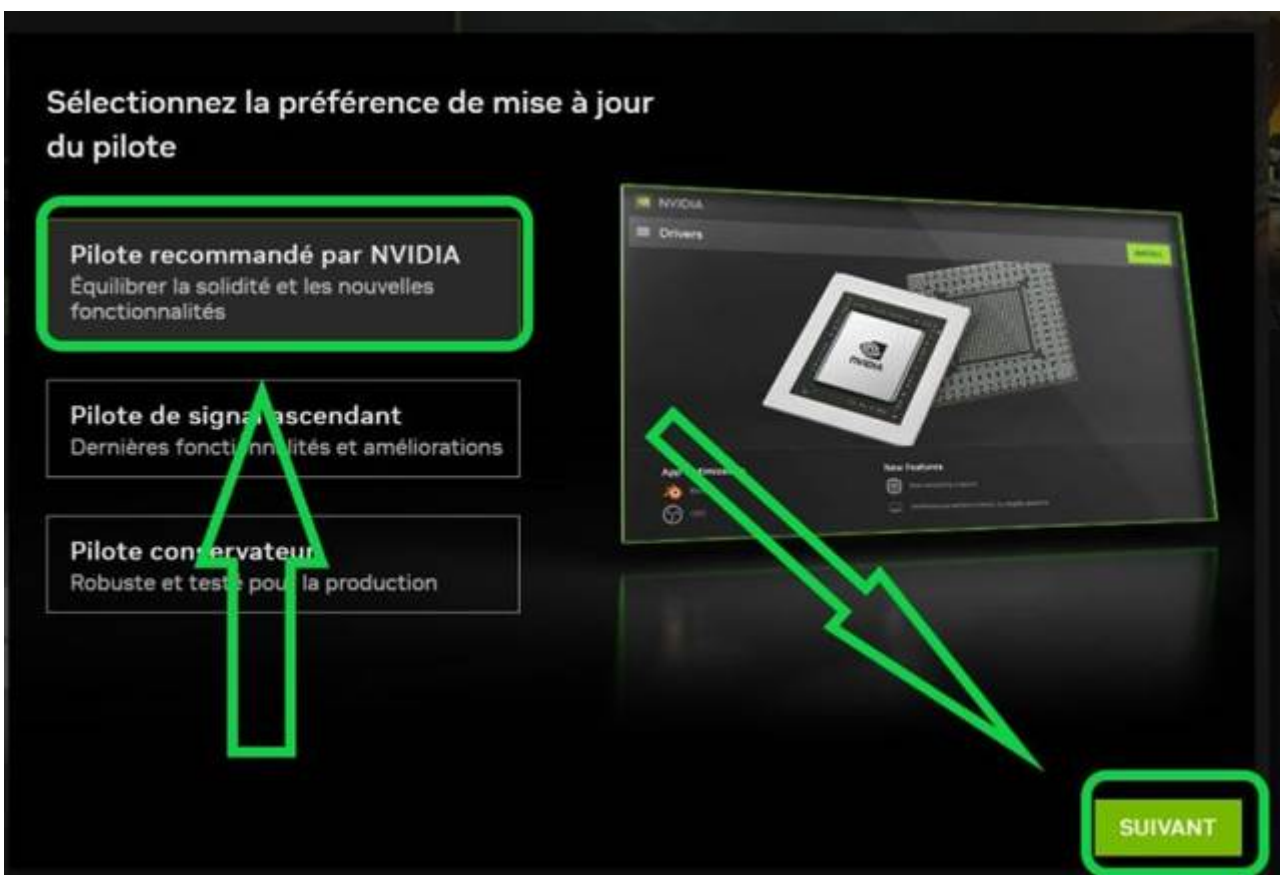

1. Search for and open the **NVIDIA App**.

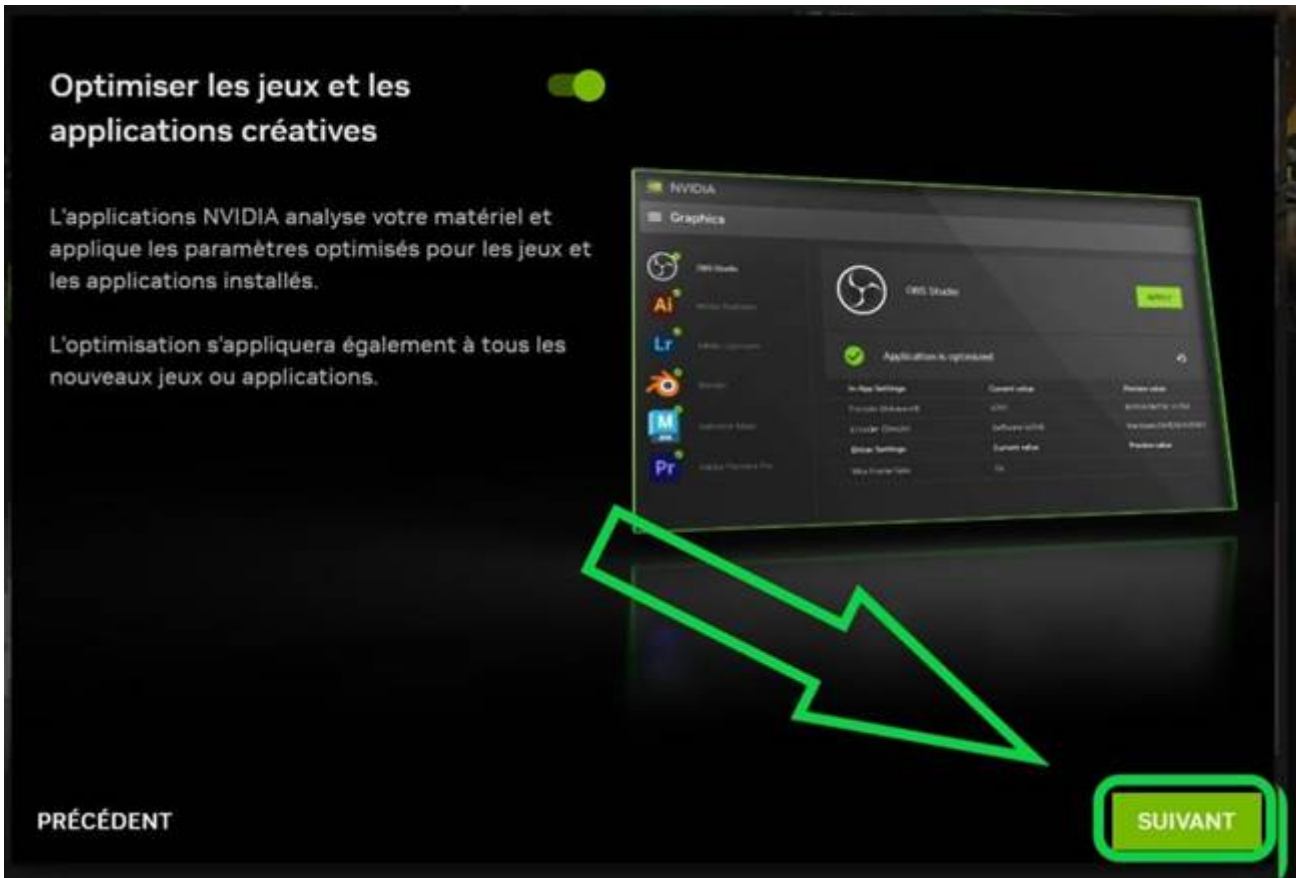

2. Click **ACCEPT AND CONTINUE**.

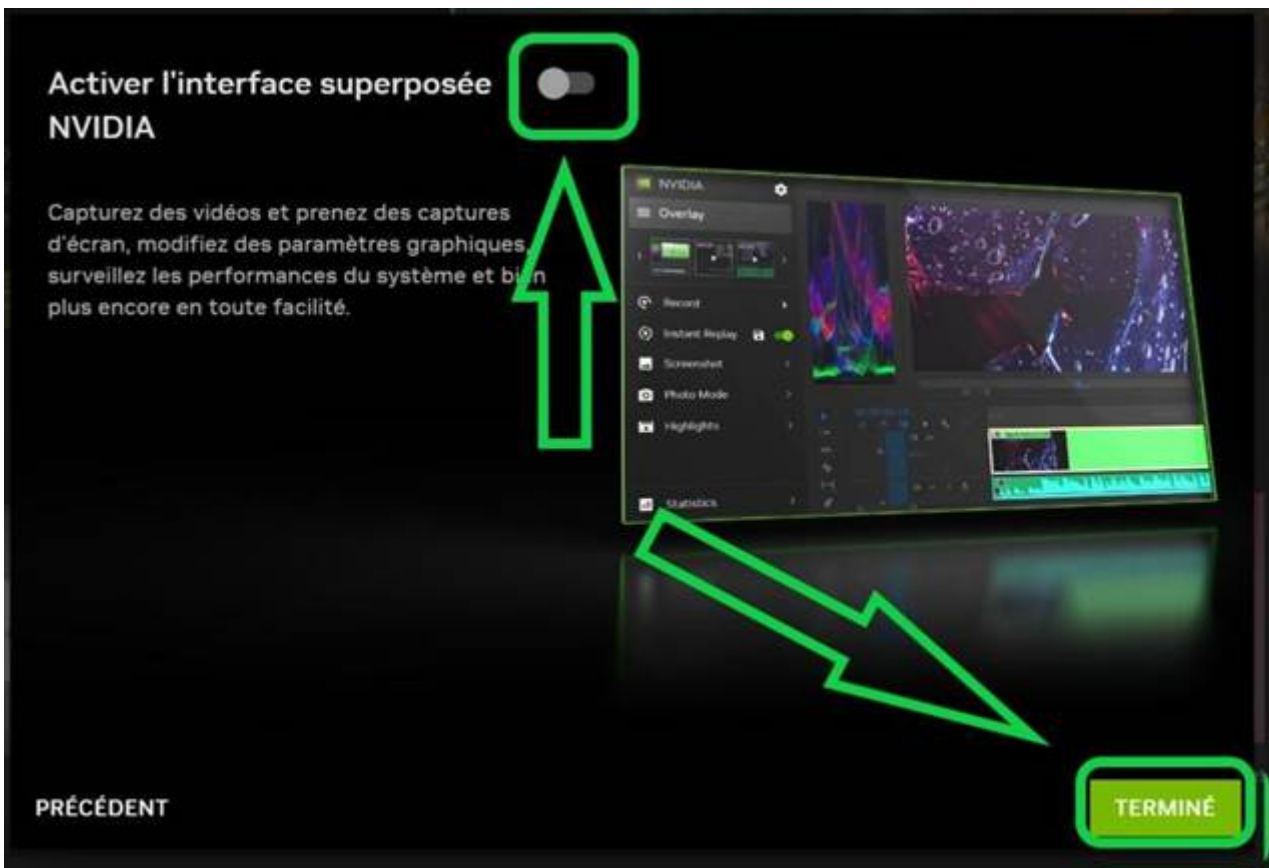

3. Select **Recommended driver by NVIDIA** and click **NEXT**.

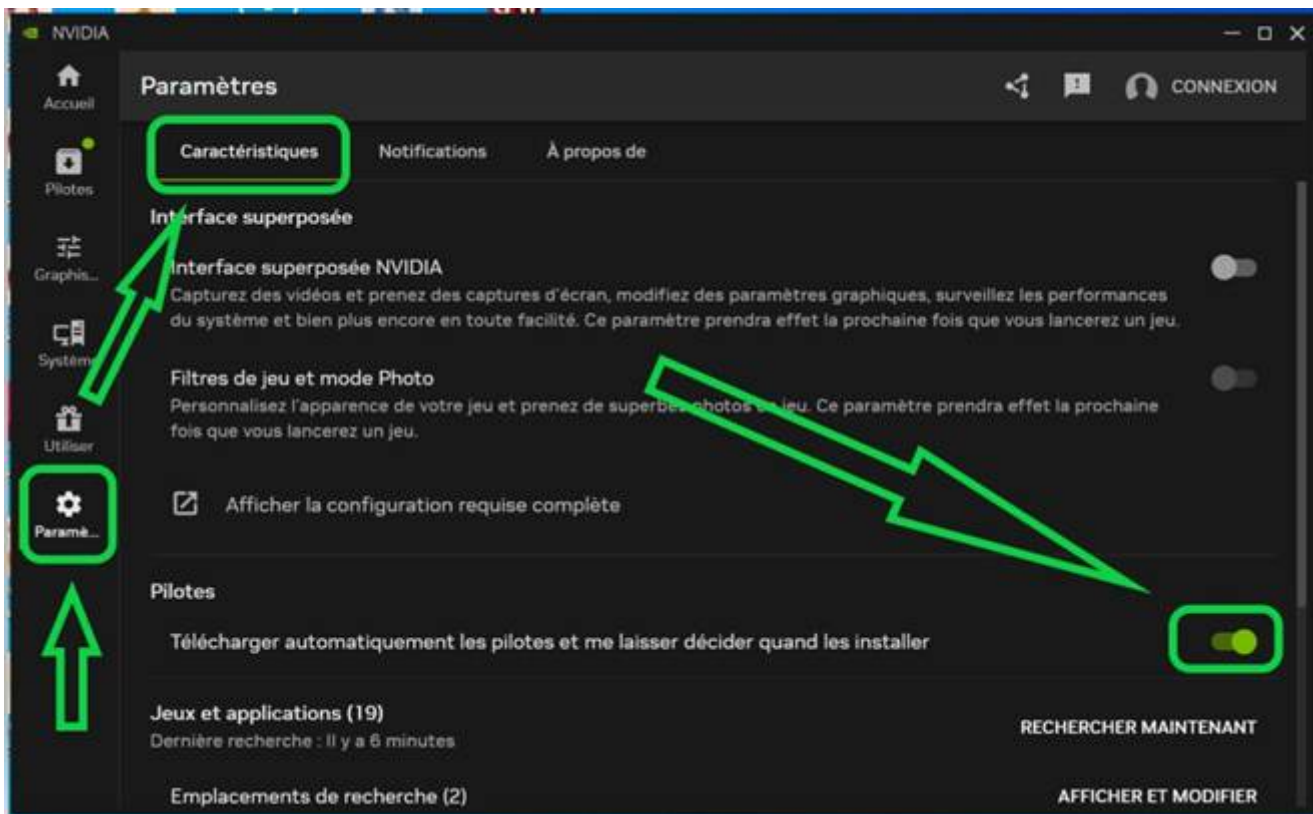

4. Click **NEXT**.

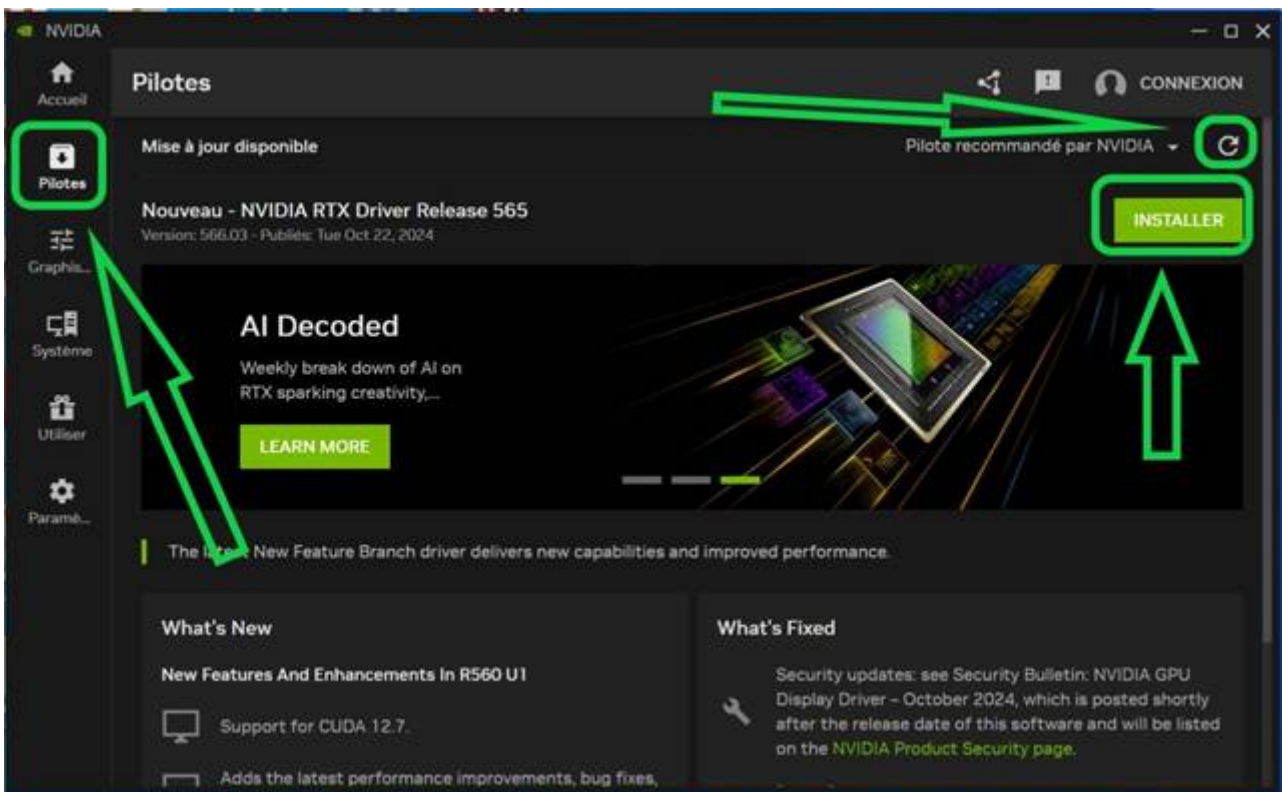

5. Disable the **UI Overlay** option and click **FINISH**.

6. Open **Settings**, select the **Features** tab, and enable the **Download automatically drivers and let me choose when to install** option.

7. Open the **Drivers** tab, click the spinning arrow icon to start a scan, and download the available driver.

8. Click **NEXT**.

NVIDIA RTX Driver Release 565
